

# Web of Science Journal Evaluation Process and Selection Criteria

# Web of Science

- Web of Science™ is the world's most trusted publisher-independent global citation database.
- We capture, index and link every piece of metadata for all items in the Web of Science Core Collection.
- We use a uniquely selective and robust evaluation and curation process by a team of expert in-house editors.
- Our principles: **Objectivity, selectivity** and **collection dynamics**

# The Web of Science Core Collection

At the heart of the Web of Science platform

Science Citation Index Expanded (**SCIE**)

Social Sciences Citation Index (**SSCI**)

Arts & Humanities Citation Index (**AHCI**)

Emerging Sources Citation Index (**ESCI**)

Books Citation Index (**BKCI**)

Conference Proceedings Citation Index (**CPCI**)

# Journal Evaluation Process and Selection Criteria

# Web of Science Journal Evaluation Process and Selection Criteria

---

Conducted by a team of expert in-house editors.

---

Not affiliated to publishers or research institutions.

---

Each editor focuses on specific subject categories, getting a deep knowledge of the publishing landscape in that field.

---

Journal data and information are collected by the editors independently rather than relying on data provided by the publishers.

---

We do not use algorithmic approaches or delegate any editorial decisions on the research community.

---

All editors use the same set of **24 quality and 4 impact criteria** to evaluate all journals.

# Web of Science Journal Evaluation Process and Selection Criteria

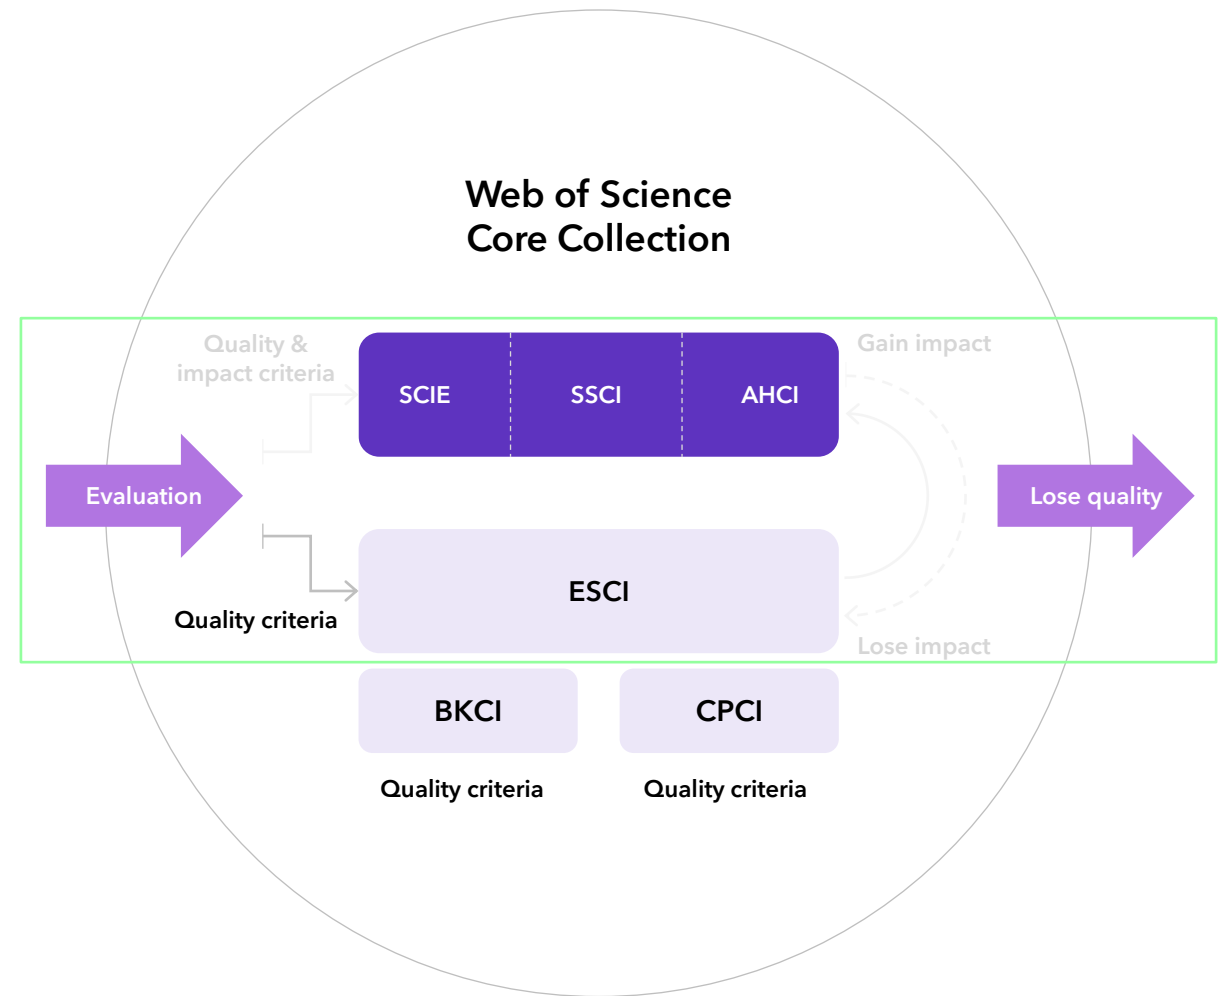

Journals that meet the quality criteria enter ESCI

Journals that meet **quality and impact** criteria enter SCIE, SSCI or AHCI

ESCI journals that gain impact move to SCIE, SSCI or AHCI

SCIE, SSCI and AHCI journals that decrease in impact move to ESCI

Any journal that fails to meet all quality criteria will be removed from the *Web of Science Core Collection*

# Journal Evaluation Process

## Quality & Impact

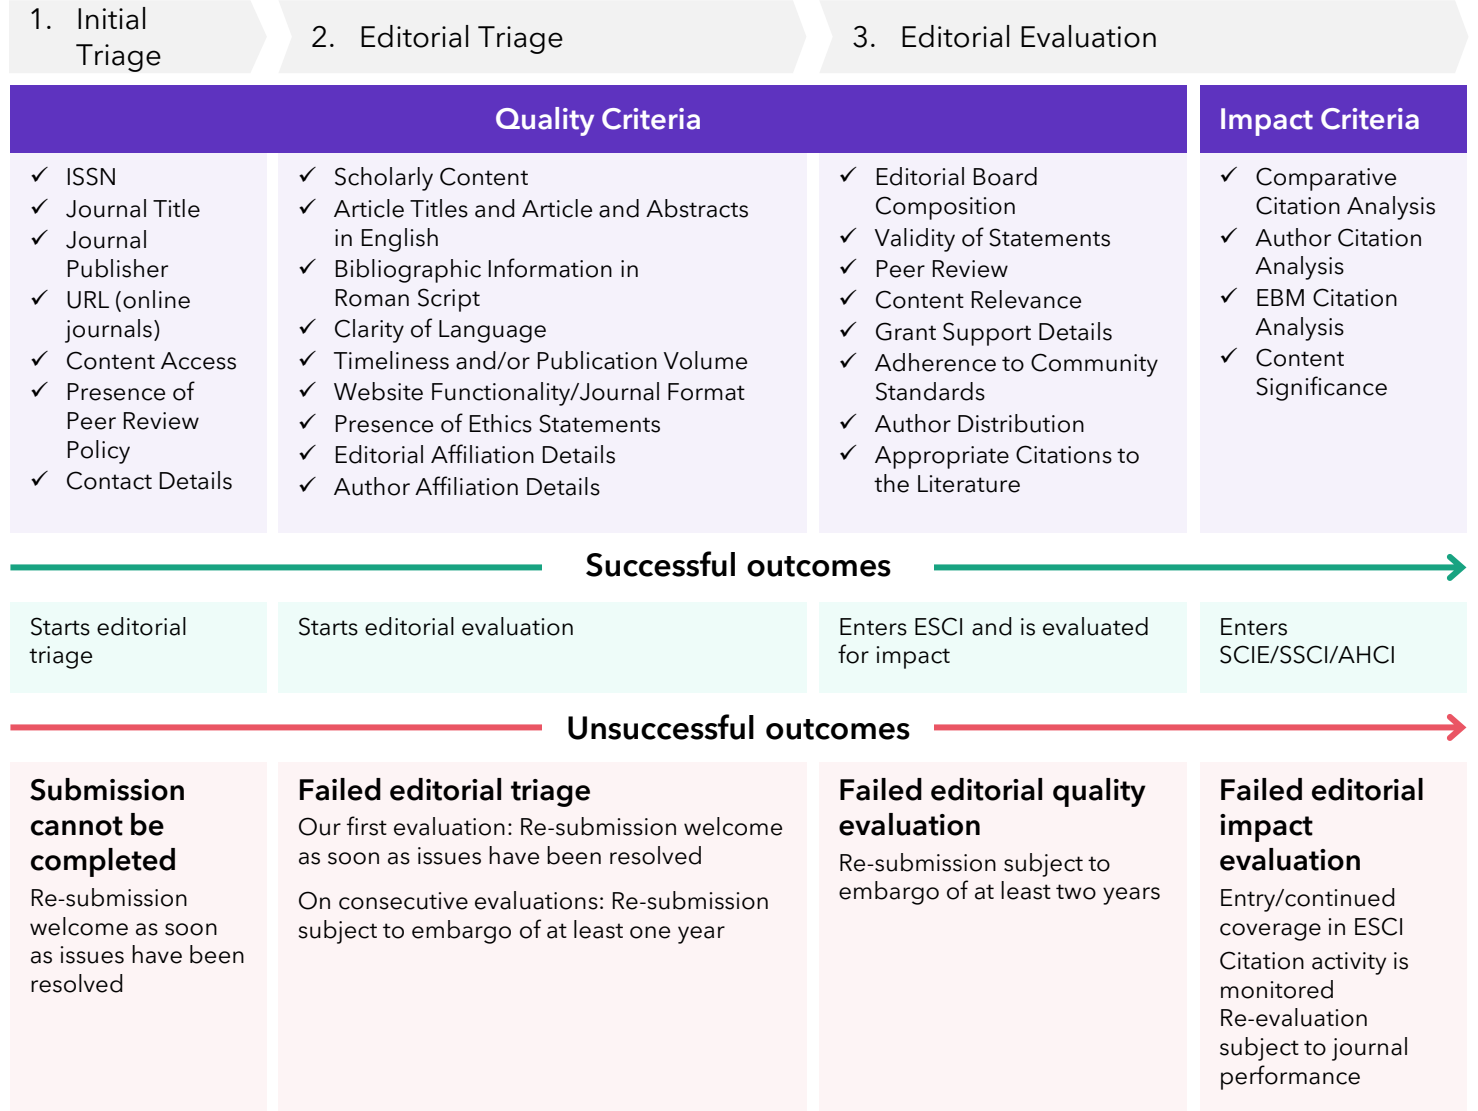

**28**  
selection criteria

**24**  
quality criteria to select for editorial rigor and publishing best practice

**4**  
impact criteria to select for the most impactful journals

The **Initial triage** stage ensures unambiguous identification of the journal, access to content and contacts.

# Changes to the 2023 Journal Citation Reports

# The Journal Impact Factor

The JIF is a journal-level metric developed for responsible use in journal management.

Article citation performance as a part of scholarly assessment is not reflected in the JIF.

We recommend this recent [ISI Global Research Report](#) related to this topic.

Starting from the 2023 JCR release, **Journal Impact Factors (JIFs)** have been extended to **all Web of Science Core Collection journals**.

In **2023 category rankings** and JIF **quartiles** are provided for journals indexed in the **SCIE and the SSCI only**.

In **2024** we will move from edition-specific category JIF rankings to unified rankings for each one of the science and social science categories, which will include **journals indexed in SCIE, SSCI and ESCI**. We will not introduce JIF rankings for the arts and humanities categories. More information in our recent [blogpost](#).

The **JIF** is now displayed with **one decimal place**, rather than three decimal places.

Read more about the updates to the 2023 JCR [here](#).
